Welcome to Tver State Medical University

Bazhenov D.V.
Vice Chancellor for International students

Welcome to our Medical University, an institution replete with tradition, values, enthusiasm, quality and international prestige.

Our educational model is student-oriented. Opportunities to learn for yourself and to participate in a research project are highly recommended. Throughout your medical training you will witness many very rich opportunities to exchange opinions and ideas with classmates from different countries, thus increasing your awareness of cultural diversity and placing you on the correct tract to treat patients of different cultures.

In our renowned Program of Medicine in the Community, opportunities to increase your clinical skills abound. Your participation in supporting the underserved population will be enormously appreciated and of immense benefit to you. You will be one of the foreign students who develop, practice and master bilingual skills while also developing skills related to humanism, professionalism and altruism.

The Tver State Medical Academy works arduously to assure that at the end of your training you will be a physician with a special profile: a knowledgeable, dutiful, clinician, communicator, researcher, and long-term learner for the benefit of your community.

Presently the population of Tver is 500,000 people. The city has well developed industry, infrastructure, high intellectual, scientific and cultural potential. Tver’s most important industries are railroad cars plant, an excavation-machine factory, textile and polymer industry.

Apart from the Tver State Medical University, Tver is home to the Tver State University, Technical University, Agricultural academy, Air Defense University, Tver Military School, Institute of the Russian Ministry of Internal Affairs and more than 20 colleges & schools, local branches of Moscow and St. Petersburg higher educational establishments.

Tver has a large number of international students studying in different universities. Presently nearly 1000 foreign students are getting education and training in Tver and enjoying the quite way of life and the hospitality of the city.
Tver State Medical University has over 6000 beds in 10 various hospitals, including specialized hospitals for oncology, tuberculosis, infectious, skin and sexually transmitted diseases. It is important to note that Tver State Medical University owns Dental clinic with more than 300 chairs, which is considered to be one of the best in the whole of Russian Federation. All the faculties and departments of the university are well equipped with the up to date medical and diagnostic equipment, the classrooms and lecture halls are fitted with multimedia apparatus.

Tver State Medical University is a WHO-recognized medical establishment. It has various profound contacts in the fields of basic medical education, postgraduate training, scientific research, diagnostics, treatment and diseases prevention with many medical organizations of Russia and other countries. The international partners of the University are the World Health Organization, the British Council, DAAD (Germany), University of Saarland (Germany), University of Osnabruck (Germany), Braun School of Public Health and Community Medicine (Israel) and some others. The main directions of international cooperation are cardiology, genetics, pediatrics, gastroenterology, ophthalmology, radiology, surgery and public health. The University regularly organizes international academic meetings, scientists and professors from Germany, UK, Canada, USA, Israel, India and other countries are invited to read lectures and to give practical training to the students.

The Tver State Medical University has 6 faculties:

- Faculty of General Medicine
- Faculty of Dental Science
- Faculty of Pharmacy
- Faculty of International Medical Education
- Faculty of Pediatrics
- Faculty of Postgraduate Training

The Medical Faculty is the biggest structural and functional sub-division of the University. The Medical Faculty is based mainly in the Regional Clinical Hospital and some of its departments are affiliated to the city hospitals and maternity hospitals. Modern diagnostics and treatment are carried out in these hospitals. Possessing excellent clinical and theoretical base, it has all the necessary facilities to train highly qualified doctors.

The Pediatric faculty was opened in 1990. The Faculty trains pediatricians not only for Tver, but also for the other regions such as Tula, Bryansk, Pskov and Moscow.

At the Faculty of postgraduate training physicians can receive specialisation in obstetrics and gynaecology, anaesthesiology and reanimation, ENT, ophthalmology, infections and tropical diseases, cardiology, gastroenterology, immunology and allergology, radiology and radiation, physiotherapy, general surgery, oncology, psychiatry, traumatology and orthopedics, urology, pulmonology, dermatovenereology, neurology and neurosurgery, endocrinology, public health, oral and maxillofacial surgery, orthodontics, pedodontics, periodontics, oral pathology, oral medicine, prosthodontics, implantontology, operative dental surgery.

The Tver State Medical University has trained medical specialists for foreign countries since 1962. Currently students from more than 50 countries study in Tver State Medical University, mainly from India, Sri Lanka, Nepal, countries of the Eastern Europe, Africa, Asia and Latin America.
The graduates of the University successfully work in government and private hospitals all over the world. Among them are Dr. Plammet, the leading endocrinologist of the C. Hayden Medical Center (USA), Dr. Volano, the royal obstetrician and gynecologist (Great Britain), Dr. Assi, the chief doctor of the central children hospital (Palestine), Dr. Comdo – the chief surgeon of the central capital hospital (Cameroun), Dr. Ajub – professor of forensic dentistry (Lebanon).

International students can study in Russian Medium as well as in English Medium, where highly qualified teachers, having done teaching training in Europe and North America give medical teachings in English.

The library has over 500,000 books in different languages written by Russian, Indian and foreign authors including 2000 medical books in English. The library is connected to the World Med Line system, the WHO Database, the Cochrane Society Database. Students have free access to the Internet resources.

- There are four hostels which can accommodate 1840 students.
- Two of them are flat type i.e. with attached bathroom, toilet and kitchen.
- The hostels are centrally heated (air-conditioned). Hostels are fully furnished.
- The basic system is two or three students in one room. Students are provided with full bedding.

Separate arrangements for boys and girls. Every hostel has internet facilities (wi-fi and broadband) provided by the official contractor of the University in Russia. Students can get Indian food at the canteen of the hostel and foreign TV channels (Hindi, Tamil etc.) are also available. All the hostels are well guarded with police security. Bed linen is changed once in a week and hostels is cleaned once everyday.

Hostel of TSMA is the only one in Russia providing Indian food & dishes made by Indian cook and prepared from Indian food products. Imported from India.
